DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Takahashi (US 5,048,704).

Takahashi, Figures 8-10, shows an apparatus for controlling connections between model railroad cars, including draw bar 3 provided at the distal end thereof permanent magnet 4 that has first and second surface areas with opposite polarities.

Regarding the side-by-side orientation of the first and second surface areas, recited in instant claim 2, consider Figure 10 of Takahashi.

Regarding the instant claimed drawbar center axis in claims 7 and 8, Applicant should consider Figure 9 of Takahashi; wherein, a center axis running horizontally through the view of the first and second drawing bars, as shown in Figure 9, should present symmetrical halves and first and second magnetic surface areas on opposite sides of the center axis, as broadly recited in the instant claims.

3. Claims 10-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 13-20 are allowable.
